

Building One-Stop Shop For Travel Marketplace

With our expert software, you can offer Hotel + Flight API to your customers directly from your website. An experienced travel technology company can design your system and deliver a viable Hotel + Flight API solution for travel retailers. Smart interface, fast search, flexible times, and naturally better collection of products are the limelights of a travel package which are the major features of our Hotel + Flight API.

Trawex offers a Hotel + Flight API module that connects flights and hotels in the travel retailer's booking software and enables them to offer a very wide range of travel products that can be booked together as a package. We need your aspirations to be served through us – we are always at our service. We support travel companies to package several travel products in real-time and distribute them in a single transaction throughout multiple circulation channels.

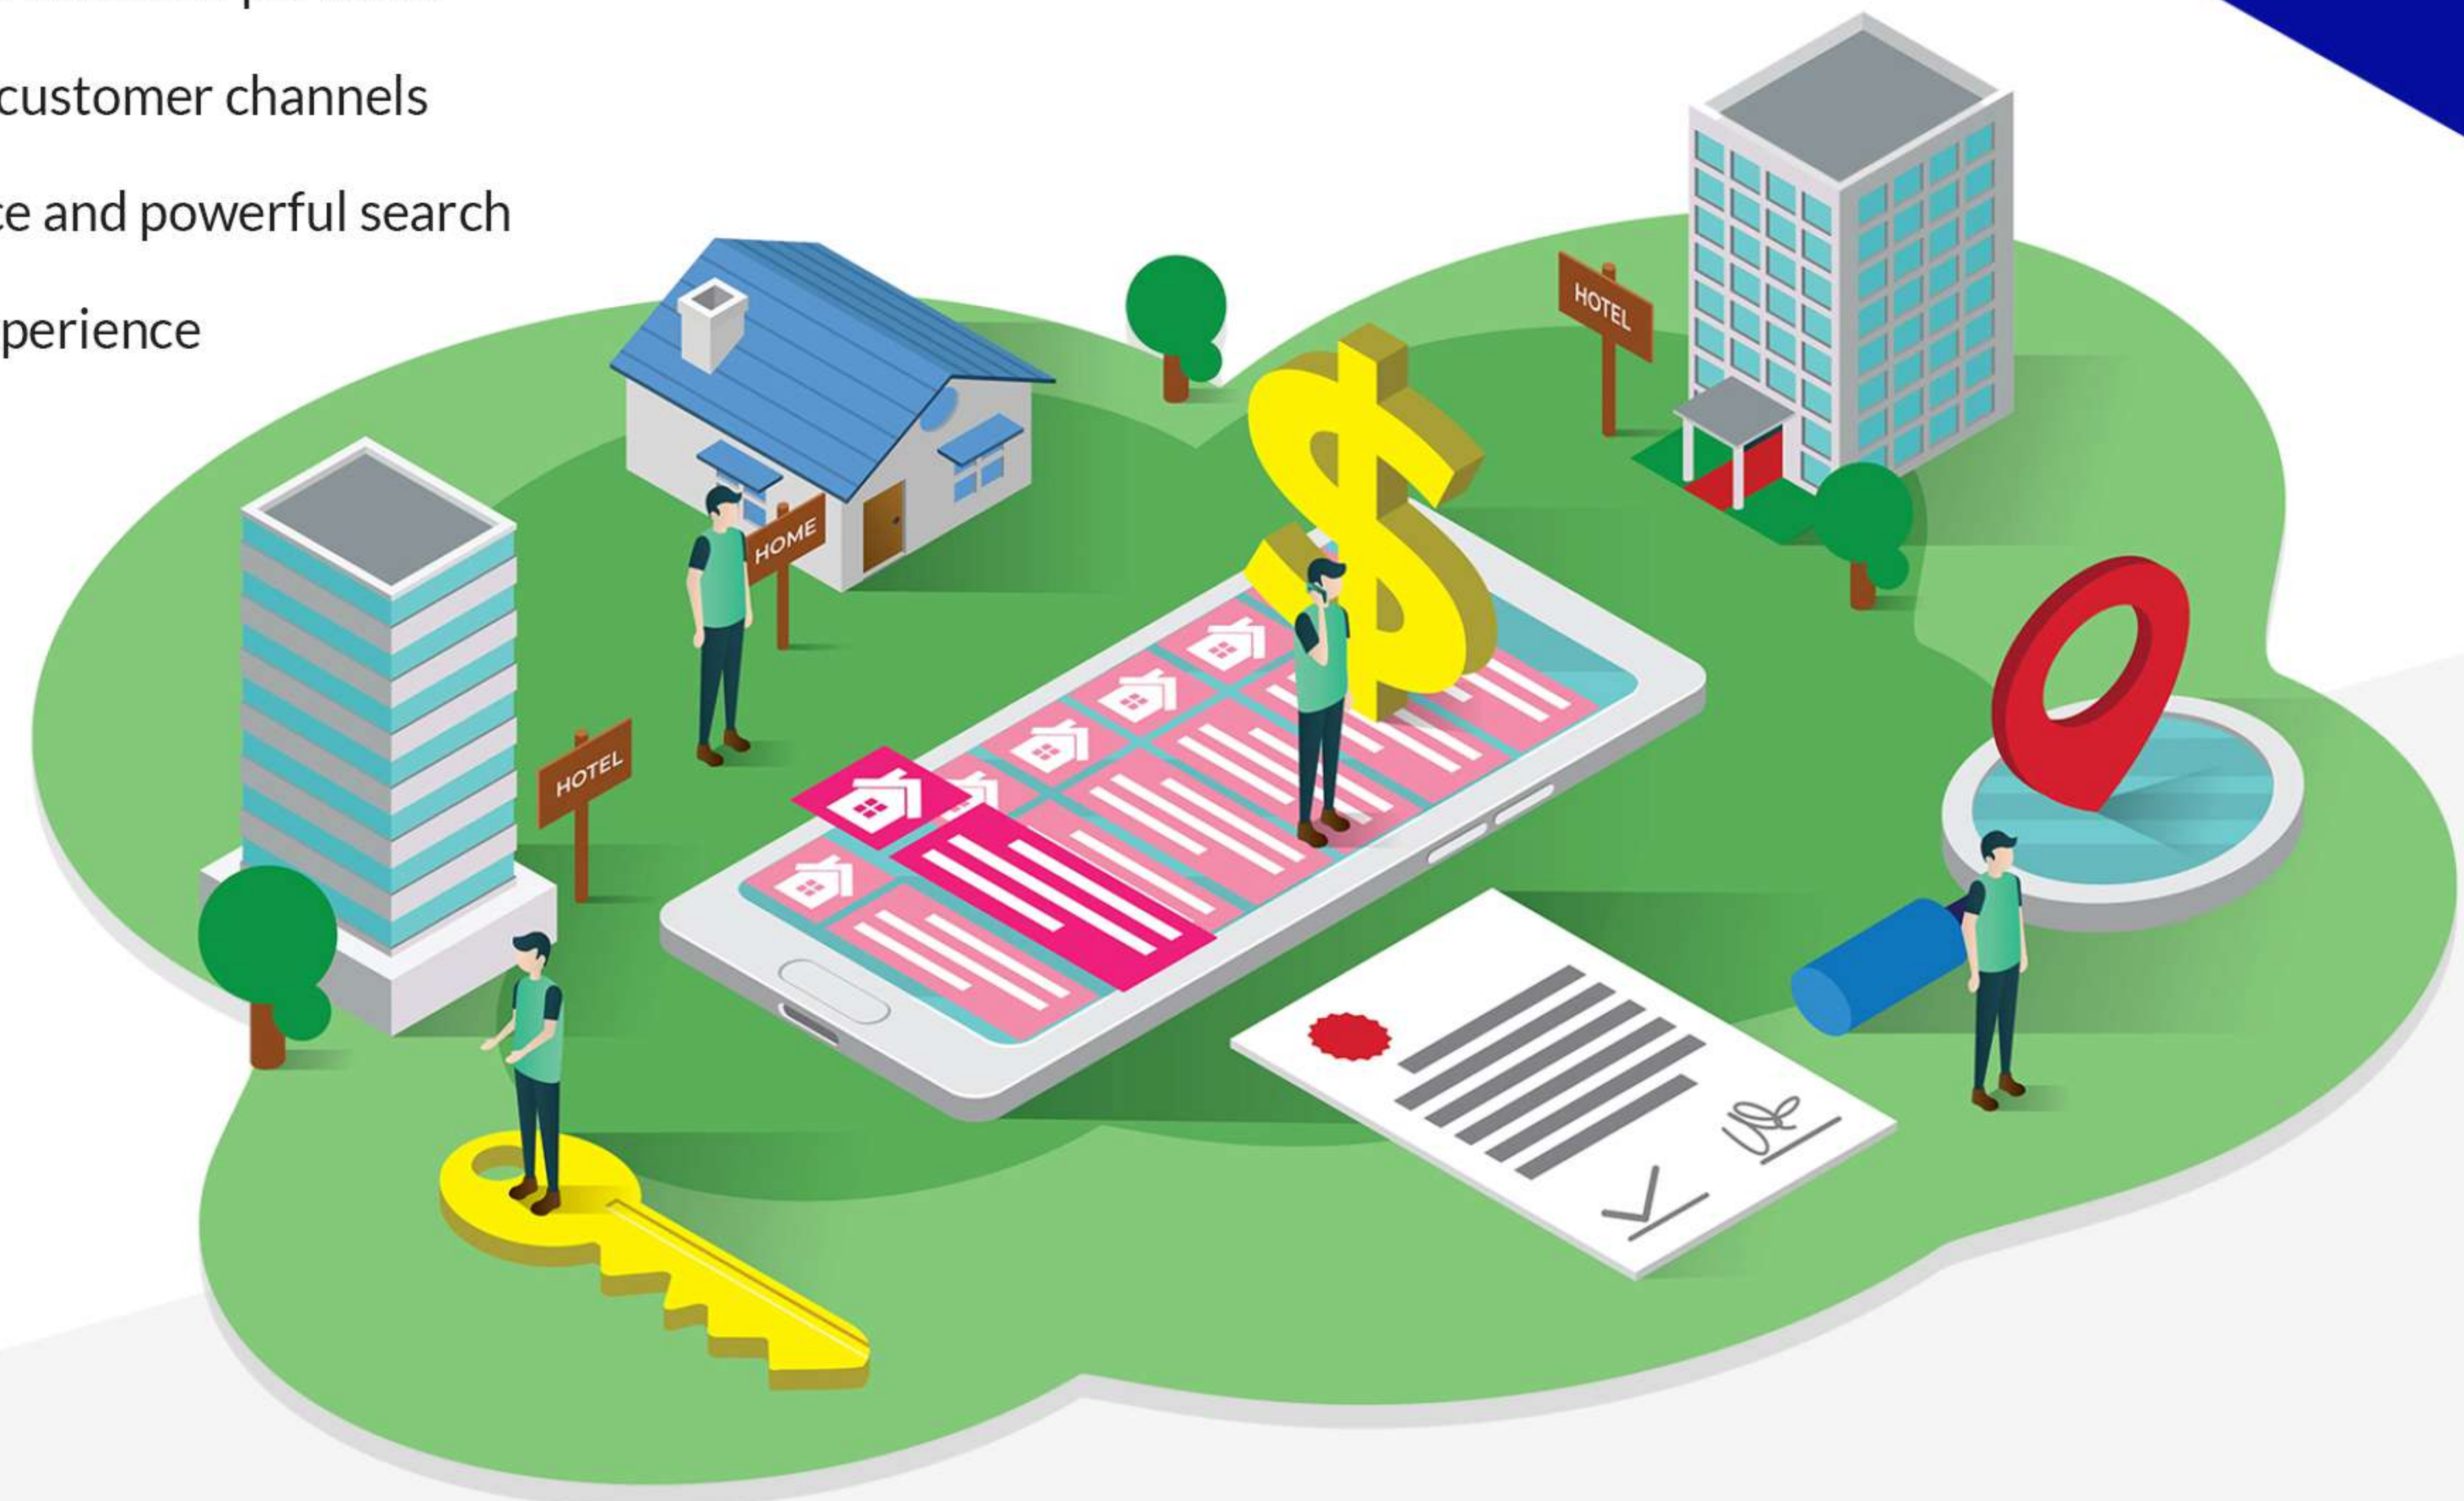

Establish Industry-Leading Technology Platforms With Trawex's Proven Hotel + Flight API

Trawex's comprehensive Hotel + Flight API solution combines your components in real time. With access to leading flight and hotel suppliers as well as fulfilment partners, create unique and competitive travel packages and ultimately increase margins.
